

From Science to Development

	Appearance	Tiles					Sanitaryware			Table Ware			Technical Cer.	Refractories	Roof Tiles	Glass	
		Bodies	Engobes	Glazes	Grits	Decoration	Bodies	Glazes	Other	Bodies	Glazes	Other					
Fluidizing agents																	
Reotan	Liquid	x	x	x			x	x		x	x		x	x			Deflocculants which increase the slip density and reduce grinding time and theixotropy
Reotan Flux	Liquid/Powder	x	x	x			x	x		x	x		x	x			Tailor made blend of dispersants for bodies and ceramic glazes
Binders, thickeners for glazes-engobes-bodies																	
Carbocel	Powder				x	x		x			x				x		CMC(Carboxymethylcellulose) Optimize the adhesion among support, engobe and glaze. Rheology modifier. It improves the strength of the glazes. It regulates the drying time
Resicel	Liquid				x	x		x			x						Synthetic binder. Rheology modifier
Amisolo	Liquid	x	x	x				x			x		x		x		Rheology modifier able to increase the viscosity and the strength of the bodies, engobes, glazes
ReadyOne	Granular		x	x													Multipurpose agent; Dispersing, anti-settling, stabilizing, binding, levelling actions
Binders, thickeners for glazes-engobes-bodies																	
Tenagreen N	Liquid/Slurry	x															Body binders for MOR remarkable increase ; no negative impact on rheology
Tenagreen FL	Liquid	x															Blend of deflocculants / binders for body ; optimization of the additives used
Tenagreen S	Liquid	x															Body Binders and Plasticizers ; excellent grow in green and dry MOR ; suitable for body reformulation
Tenagreen WW	Liquid						x				x						Body Binders and Plasticizers for whiteware bodies
Printing mediums																	
Inkoil	Liquid					x											Printing medium for decorations by silicon engraved rollers
Seroil	Liquid					x											General purpose screen printing mediums (traditional, they require the use of fixative)
Printoglass	Liquid														x		Water friendly Medium for screen flat and roll coat application.
Medium for micro grits																	
Gritmed	Liquid				x												Anti settling and levelling mediums for microgrits application (wet and dry method)

Product Range

	Appearance	Tiles					Sanitaryware			Table Ware			Technical Cer.	Refractories	Roof Tiles	Glass	
		Bodies	Engobes	Glazes	Grits	Decoration	Bodies	Glazes	Other	Bodies	Glazes	Other					
Digital solutions																	
Fluijet	Liquid					x											Hyper dispersant for inkjet developments
Fluijet G	Liquid															x	Hyper dispersing polymers used in solvent and waterborne inks for Glassware
Printojet	Liquid					x											Mediums / solvents for inkjet formulation
Printojet S	Liquid		x	x													Mediums for water based engobe and glaze applied Digitally
Viscojet	Liquid					x											Thickener agent for inkjet formulation
Tensiojet	Liquid		x	x													Surfactant blends for glazing line equiped with digital machines
Tensiojet B	Liquid		x	x				x									Multifunctional additives for glazing line equiped with digital machines
Stabilizers/Preservatives																	
Carbosan	Liquid	x	x	x			x	x		x	x		x			x	Preservatives, anti fermenting agents
Whiteware binders/ rheology modifiers for engobes and glazes																	
Tixolam	Powder							x			x						Binders and anti-settling agents. Rheology, drying time, tixotropy modifiers. Ideal for the glazing of vertical surfaces
Special products																	
Sospensil	Liquid/Paste	x	x	x				x			x						Anti settling agent
Reolam	Liquid						x				x		x				Thickeners formation speed enhancer /de-watering aid
Demolam	Paste									x						x	Releasing agent for the production of plaster/resin moulds
Viscolam	Liquid/Powder					x											Thickeners, rheology modifiers
Lamrun	Liquid	x											x				Coadjuvant, antistatic, lubricant agent for dry grinding processes
Neoprint	Paste			x		x		x			x						Temporary colours. The colorants disappears during the firing stage
Ecolighter	Liquid									x						x	Not flammable liquid Highlighter for dry whiteware inspection
Ecofix New	Paste									x						x	Medium for application of decals application on ceramic raw glazes
Surfactants																	
Tensiol	Liquid	x	x	x	x	x	x	x		x	x		x			x	Levelling , antidimples, defoaming agents
